We at [DialysisEthics](#) have been let down by government, the renal networks, and of course the dialysis companies - no accountability and no sanctions. Those dealing with kidney disease face a lot of problems, they don't need to also be dealing with a system that many times doesn't have their best interests in mind: [Larry Hall's dismissal and other stories](#) .

An [alliance](#) is being formed of people from many different walks of life with one thing in mind - to help those dealing with kidney disease. This alliance is a group of people who finally have had enough. Right now we are aiming to have things come together this January with a new website, national ads, and enough clout to get done what needs to be done.

We are asking for volunteers to sort complaints from those dealing with kidney disease, about those who should be helping. [CONTACT US](#) .
